

***Collaboration, Conservation & Commitment
on the Pinedale Anticline***

BALANCING RESOURCES:

Energy, Environment and Communities

- ✓ **Fully develop the resource in a safe and efficient manner**
- ✓ **Reduce habitat fragmentation and maintain corridors for wildlife migration and movement**
- ✓ **Reduce emissions**
- ✓ **Improve safety and socio-economic benefits with steady, managed activity throughout the year**

Balancing Resources

Energy

- ✓ **Second largest gas field in US ***
(20-25 Recoverable TCF)
- ✓ **Concentrated year-round development**
- ✓ **Directional drilling from multi-well pads**
- ✓ **Earlier and interim reclamation**

**Source: Energy Information Administration*

Balancing Resources *Environment*

- ✓ **Minimize habitat disturbance and fragmentation**
- ✓ **Reduce traffic and human activity**
- ✓ **Wildlife studies**
- ✓ **Protect air quality**
- ✓ **Fund air monitoring**

***8% total surface disturbance within the Project Area
from this natural gas development***

Balancing Resources

Community

- ✓ **Steady year-round workforce**
- ✓ **Smooth boom-bust cycles**
- ✓ **Improve local leaders' ability to forecast and plan**
- ✓ **\$16 billion in royalties over the life of the field**

Responding to the Challenge

Monitoring & Mitigation

- ✓ **Create Mitigation and Monitoring Fund**
- ✓ **Mitigation based on goals and objectives determined by collaboration with State and Federal agencies**
- ✓ **Offer to voluntarily suspend activity on flank leases in certain areas**
- ✓ **Annual and 10-year planning with State and Federal agencies**

Collaboration, Conservation & Commitment
